

Which of these statements make sense? What distinguishes those that make sense from those that do not?

1. If one girl can walk to school in 10 minutes, two girls can walk to school in 20 minutes.
2. If one box of cereal costs \$2.80, two boxes of cereal cost \$5.60.
3. If one boy makes one model car in 2 hours, he can make three models in 6 hours.
4. If Huck can paint the fence in 2 days, then Huck, Tom, and a third boy can paint the fence in 6 days.
5. If one girl has 2 cats, then four girls have 8 cats.
