Setting Goals for Improving Mathematics Teaching and Learning

What do you want to try, work on, or refine in your mathematics teaching this year?

Consider:

- Facilitating discourse, using good questions
- Using differentiation strategies
- Teaching small groups
- Having students work in partners, triads or groups of 4
- Using a problem solving approach
- Using open-ended tasks
- Having students represent math ideas in a variety of ways
- Scaffolding math concepts
- Using manipulatives and realia

Name ____________________________

List and describe your goals.
Think of some ways you might start to work on each goal.

What, if any, questions do you have about your goals or starting to work on them?
